CALL AND EXAMINE OUR GOODS

AND LOW PRICES. E. J. MILLER & CO.,

MONDAY EVENING, AUGUST 27.

Will Ice Make a Person Cool or Not? There is a very universal demand during hot weather or at times when the body is much heated-say at a dance-for the temporary relief which ice or iced drinks can give. The penny ice stall in the streets, where small boys are seen taking in unwholesome looking icen without the intervention of any spoon, and the iced drinks freely advertised in the windows and on the walls of public houses, may be taken to represent the lower grades of popular de mand. From this we ascen I by various "cups." ices, ice puddings, ice water, tea or coffee, to iced wines and champagne frappe. At the refreshment stail of railways or places of amuse ment, or bazaars, in the dining room or the ball room, at the concert or the play, ices and iced things are to be found; and their consump

tion is gradually increasing. Grateful as the coolness of ice may be, the gratification of its use is one which cannot be obtained without the incurring of considerable risk; and an article in the Lancet shows that medical men are alive to the dangers which attend the excessive and inconsiderate consumption of ices which goes on at this season in s)

many social meetings of different kinds. It is recorded in the daily papers that a short time ago a man, a cook at a restaurant, who had become greatly heated, swallowed a quantity of ices. Soon after he complained of being ill, and the next day he was dead of inflammation of the lungs. It is not asserted that the inflammation was entirely the result of eating the ices, but it is asserted that the attack was helped forward by their consumption. Medical men tell us that the sudden applica-

tion of severe cold to any of the internal organs, as when ice is swallowed, must be as injurious to these and to adjoining ones as is that of intense cold to the skin. Heat may thus be abstracted, not only from the stomach, but from the heart and from the lungs, and the nervous chock of the cold may be carried through the whole system. Severe pain in the foreless often follows the eating of an ice after dinner. Every one knows and tries to avoid the evil effects of swallowing large quantities of cold water when the body is heated; and it ought to be remembered that whatever mischief water can thus effect, ice can do still more because the cold is more coacontrated.

Nor is this burtful cooling of the system the only evil effect of taking ice. When ice is swallowed it produces congestion of the numerous mall vessels which abound in the inner cost of the stomach, and entirely stops the secretion of the acid gastric juice which must mix with the food in order that it may be digested. So that the perils of indigestion are added to those of which we have already spoken. Morecver, doctors tell us that if this state of things is frequently brought about, a tendency to chronic inflammation of the digestive organs may take

A very simple experiment will make clear the effects of the application of ice to any part of the body. If a piece of ice be put on the back of the hand, and keep there for a short time, tho skin becomes first pale, and then is rapidly reddened, and remains so for a long time. This reddening is the result of congestion of the small vessels of the skin, and any one who observes it will have a fair idea of how the stomach is affected when ice is swallowed. Moreover, the congestion leads to increased thirst, and so the relief of taking ice is but brief, and taking all things into consideration, is one that is dearly paid for. As hardly a summer passes without the occurrence of a grave or a fatal illness following and partially resulting from the indiscriminate use of ice to relieve thirst, the matter

is one of much importance to the whole community .- London Queen . Shall Sitting Bull be Given Up?

To Lord Dufferin, Gov. General of Canada: SIR-You will, I know, pardon the intrusion-if you deem it one-of my calling your attention to the grave bearing of the United States government's claim, or request, that you surrender the Indian chief Sitting Bull. It has been England's pride for centuries that her borders were ever a shelter for the victions of political misrule; that while she surrendered ordi nary criminals she never gave up the defeated parties in a civil war or any like struggle. I need not tell you the long story of our government's cruel injustice toward the Indian and gross misrule in all pertaining to him. Were this man a citizen, one of thousands who had rebelled against such injustice, and sought shelter in his defeat, England would never surrender him. But the Indian is not a citizen or a simple subject, since we make treaties with bim, asking his surrender of his land, instead of taking it by any claim of eminent domain. and leave him under an irregular tribal government, independent of our civil law; we make war on him, and we conclude peace with him. Such a party, whatsoever his offence, cannot be treated like an ordinary criminal and reckoned within the purview of international treaties on such subjects. To surrender him is to surrender one in arms not against his own acknowledged government, but one in arms against a government which, in a large degree, shuts him out from the limits of its civil polity; a government which he disavows and repudiates, and which, you know, will do him, no justice. All our history attests this. Canada's success with the Indian, since the proclamation of George II. in 1740, grows from the method she then adopted of making the Indian a full citizen and melting him into the common mass. Our fail ure is because we have always put force in the place of law, and shutting the Indian out from the shelter of law have treated him like an alien and an outlaw. In such circumstances we have no right to ask England's help to subdue him. Her granting it would be disloyalty to all her traditions, and a confession that she had ceased to be what poet, orator and statesman have so long claimed for her -the refuge of the wronged. I am speaking only of an insignificant race and a quarter million of people. But the principle touches the most sacred and honorable of England's traditions. Could the case be brought to the notice of the English people and fully understood, as it would be in the blaze of a month's discussion by your journals, I am sure no power on earth would ever drag the Indian chief from the shelter of English law. Every reason which made England refuse to give up the fugitive slave exists in the Indian's case. and there are some considerations which make

the greed and the neglect of a powerful and grasping people. Respectfully yours, WENDELL PHILLIPS. Boston, U. S. A., August 23, 1877.

his claim to protection even stronger than the

negro's was. I beseech you, sir, let not the first

time that England's magnanimity in this way

fails be in the case of this friendless and hunt-

ed race, meted out and trodden down alike by
